

EDITORIAL COMMENT.

The circus will be in Ford's field on North Main street.

Senator James will open his Kentucky speaking campaign Oct. 16 at Mayfield.

Chas. E. Craik, the Louisville physician hurt in an auto accident, now has a chance to recover.

Let every Democrat who lives in Hopkinsville register next Tuesday. The unregistered voter loses his vote.

Voters in Jefferson county outside of Louisville will not be required to register, the law being held unconstitutional by the Court of Appeals.

The Rev. Dr. C. E. W. Dobbs, for many years a leading member of the Southern Baptist ministry, died suddenly Thursday at the home of his son, Charles Dobbs, in Louisville.

State Forester, J. N. Barton, has appointed H. G. Dickerson forest warden for this county to serve during the "fire season," which usually starts about the first of October.

Hon. William Jennings Bryan is scheduled to make an address at Elizabethtown, on Thursday, October, 19th in the interest of the Wilson-Marshall ticket.

Nearly a million people have been made homeless by one of the greatest floods on record in that section of China where the American Red Cross already has spent \$600,000 for flood protection.

Harry A. Garfield, son of the martyred President, has declared that he will vote for Wilson for President. President Eliot, of Harvard University, has declared his intention of doing the same thing.

The Court of Appeals ruled that the nomination of M. J. Meagher, of Frankfort, for a Senate seat made vacant by the retirement of Senator George Speer, was void because the Governor had not issued a writ of election.

During the summer girls at Sapulpa, Okla., were caught bathing in the city's reservoir from which drinking water was obtained and much trouble was had keeping them out. The Chief of Police says he is glad cold weather has come.

Nine book-makers in Lexington were fined Thursday without the formality of a trial, the verdicts being entered on a submission of law and facts. Eight were fined \$200 and costs and one \$50 and costs.

One thousand cigarmakers in five factories went on a strike at Tampa, Fla., Thursday, for higher wages for piece work. The men demand increases ranging from \$1 to \$7 per thousand for work on mold-made cigars.

According to a report from the Southern Railway 174 persons trespassing on the road's right of way were killed during the year ending June 30. The reports says that trespassing seems to be on the increase everywhere, despite the warnings against it.

There will be no registration in rural precincts of Jefferson county. The Court of Appeals reversed the Jefferson Circuit Court, which had refused an injunction to Charles Ogden to restrain the Sheriff and County Clerk from holding the registration. The court held the act of 1916 unconstitutional.

A Petrograd dispatch says that Field Marshal von Hindenburg's new plans are arousing much discussion in the Russian capital because the German Commander-in-Chief is known to attach more importance to the Eastern than Western front. Russian military observers believe that Von Hindenburg is even prepared to retire to the Rhine rather than permit a further Russian advance and a defeat in the Balkans.

KING STILL
HESITATES

With Rebellion Spreading Declaration of War Is Delayed.

HIS OVERTHROW HINTED

Great Battle Develops on Eastern Front Between Luts and Valdimir Volynski.

London, Sept. 29.—Greece's entry into the war on the side of the entente allies has not yet been announced. An unofficial dispatch from Athens gives the text of the proclamation of a provisional government in Crete by former Premier Venizelos and Admiral Coundoriotis which declares that if the king should decide not to take the lead of the national forces "it is our duty to do the needful thing to save the country from ruin."

MYTILENE JOINS REBELLION.

Athens, Sept. 29.—The local loyal officers and soldiers of the garrison in Crete who are said to consist of a third of the Greek force on the island, have requested the entente allied consuls to provide means for their return to Athens.

The island of Mytilene has joined the Venizelist movement, all the local authorities having placed themselves under the "committee of national defense," established in Saloniki.

NAVY IS UPSET.

The departure from Athens of Admiral Coundoriotis besides causing a deep impression on the king, has completely upset the navy. The Greek battleship Hydra and two torpedo boats have left the anchorage with the Greek fleet and joined the entente allies fleet in Salamis bay.

The king called a conference of Premier Kologeropoulos, General Moschopoulos, the chief of staff, Rear Admiral Damianos, the minister of the marine, and Nicholas Strathos, ex-minister of marine, at the palace this morning to discuss the action to be taken in view of the silence of the entente powers respecting Greece's proposal to join the allies, made through the Greek minister at the entente capitals ten days ago.

BRITISH MAKE SMALL GAIN.

Except for a fresh attack on the part of the British which gave them the greater part of a German redoubt north of Thiepval and six hundred prisoners, the troops on the entente allies lines in the region between the Somme and Ancre rivers in France apparently are taking a breathing spell and consolidating positions captured in the great offensive which began last Monday and has already netted them Combles, Thiepval and other strong German positions at various points along the twenty mile front.

During the work of consolidation, however, the big guns of the British and French are hurling tons of steel against the new positions the Germans have taken up, doubtless in preparation to another fresh attack with Bapaume and Peronne the ultimate objective.

BIG BATTLE IN EAST.

Meanwhile a big battle is in progress on the eastern front in the region between Luts and Valdimir Volynski, around Svinusky and Korynitza, where the Russians are attempting to advance, but the Teutons are impeding them by heavy counter attacks.

HALF MILLION PRISONERS.

The Russian general staff announces that since General Brussiloff began his offensive 420,000 officers and men of the Teutonic allies have been made prisoners and 600 cannon and 2,500 machine guns and mine throwers have been captured.

Around Petroseny and Hermannstadt in Transylvania the Teutonic allies and the Rumanians are engaged in bitter fighting but with no important result having been attained by either side. The situation in the Dobruja region is unchanged.

RINGLING BROS.
HERE TODAY

Show Carrying More Than 1,350 People and 2,000 Animals Will Exhibit.

TWO PERFORMANCES

Three-Mile Parade Will Be Given on Principal Streets of City.

Ringling Bros.' World's Greatest Shows will give two performances in this city today—afternoon and night. The first show train was scheduled to arrive about daylight, coming from Evansville where the big circus exhibited yesterday. This tremendous organization travels on a train divided into four sections made up of 89 cars. There are about 1350 people with the show, a herd of 31 elephants, 735 horses and 108 dens of wild animals.

The circus parade—and even that is sure to attract the grown-ups as well as the youngsters—will leave the show grounds soon after 10 o'clock and traverse the usual line of march through the principal streets of the city. It is promised this procession will be more gorgeous and beautiful than any previous processional display ever seen in Hopkinsville.

It will be more than three miles in length and will include not only all of the famous Ringling horses, but a long line of glittering tableau wagons and allegorical cars, as well. There will be scores of handsome floats filled with gaily garbed dancing girls; a "Wild West" section will include cowboys, cowgirls and Indians from the plains and ranches of the far West.

A company of Cossack riders from Russia will form another section of the parade and practically all of the finest specimens of the Ringling menagerie will appear in great open dens. Almost the entire herd of elephants, thirty-one of them, will also participate in the procession. The music will be rendered by six bands and two calliopes. Another striking feature will be a mounted band and a team of twelve camels, broken to bit and bridle and driven like horses, drawing a huge parade float.

The main tent program will open with the stupendous fairyland spectacle "Cinderella," which is said to be the most gorgeous of all the great pantomimic productions staged by the Ringling Brothers.

More than 400 performers will participate in the various acts in the three rings, two stages and the aerial rigings, and of this number more than two-thirds are foreigners, making their first appearance in America this season.

Among the novelties will be Antonio Zingaro, and his band of reckless gypsy riders; M'le. Leitzel, the world's greatest lady aerial gymnast; the Tamaki troupe of Japanese jiu-jitsu experts; the Ching Hing Lee troupe of star performers from the Chinese Imperial Circus of Peking; Birdie Ford, premier danseuse of the high wire; the Joseffson troupe of the Iceland athletes; the world famous Clarkonians, and the Nelson troupe of daring aerialists; the Lloyd family of riders, and the McCree-Davenport riding troupe. A feature of the performance will be a complete circus of trained animals, designed especially for the children, and including wonderful troupes of trained bears, ponies, dogs and monkeys.

On the Macedonian front Paris reports the repulse of Bulgarian attacks on both sides of Florina. There have been bombardments by the British of positions of the allies of the central powers by land batteries in the vicinity of Doiran and by warships in the Aegean sea.

Aside from an infantry attack by the Austrians in the upper Cordevole valley, which Rome says was repulsed, only artillery duels have taken place in the Austro-Italian theater.

NEW YORK
STRIKE FAILS

Little Evidence of a Tie-Up Can Be Found Anywhere.

RELUCTANT TO GO OUT

Few Unions Answer Sympathetic Strike Call—Leaders Still Hopeful.

New York, Sept. 29.—The widely exploited sympathetic "walkout" of trades unionists in Greater New York in aid of the striking carmen, which was supposed to have started yesterday, had not materialized last night, according to the police. The labor leaders claimed, however, that upward of 140,000 workers actually had quit their places, but refused to make public the names of any unions answering the call. The police declared they were unable to find any evidence of a general strike.

TOM MCGEEHEE
ARRESTED

Alleged Slayer of "Dick" Wells in Todd County Caught in Muhlenberg.

Elkton, Ky., Sept. 28.—Tom McGehee, charged with killing W. H. Wells, at his home on Rabbit Ridge Monday afternoon, was arrested at the home of his son, Dillard McGehee, at Vancroft, Muhlenberg county, by Deputy Sheriff W. T. Clardy and H. T. McIntosh, of the county, and Chas. Wickliffe, of Muhlenberg, and brought here and lodged in jail. His examining trial is set for October 7. The killing has created intense excitement in that section of the county.

McGehee claims that he acted in self defense and that the dead man's father, Ben. H. Wells, started the trouble by cursing and abusing him and his grandson, Taylor McGehee, as soon as they appeared at the Wells home, where, according to McGehee, they had gone to fire some tobacco raised on Wells' place by Taylor McGehee. He says that Dick Wells soon appeared and taking a shotgun from his father's hands, began shooting. He claims one shot struck him before he opened fire on Wells.

McGehee's wound, although it bled freely and enabled the officers to track him for miles by blood stains on the ground, is not serious. A warrant for Taylor McGehee, Tom McGehee's 14-year-old grandson, who was present at the time of the killing, was issued this morning and a message received late this afternoon was to the effect that the youth had been arrested.

FINE LAND
TO BE SOLD

Will Be Offered For Sale at The Courthouse Monday Morning.

Mr. A. H. Wallace, of Newstead, announces that, if not sold privately before, he will, on next Monday, offer at public sale at the courthouse in this city, 150 acres of land. This land is a part of his Newstead farm and has on it a good tenant's house, tobacco barn, and other improvements. About 30 acres in good timber. This farm is well located and is a most desirable tract.

Signs of Weakening.

Great Britain has withdrawn regulations for the importation of cigar tobacco, but the new order has no relation to the protests of the dark tobacco growers of Kentucky.

RAINED ON
THE ORPHANS

The Last Day's Session Was Marred By Inclement Weather.

FAIRVIEW TRIP LEFT OFF

Meetings Thursday Were Held In The Avalon, Where Dinner Was Served.

Following a brilliant reception at the Elks Home Wednesday night, the Orphans Brigade concluded its session Thursday.

The last day was marred to some extent by heavy rains. For this reason the expected all day visit to the birth place of Jefferson Davis, at Fairview, had to be foregone, except for a brief visit paid it during the afternoon by some of the veterans who were especially interested in it.

At noon the dinner which had been prepared by the ladies of Hopkinsville and which was to have been served at Fairview, was spread at the Avalon.

The vim and spirit evidenced by the old veterans was a subject of general comment here. They walked about the streets and paraded with martial step and bearing. One of the number, T. J. Jeffries, who is eighty-four years of age and who served with the 24th North Carolina infantry, demonstrated his nimbleness by standing on his hands at his hotel.

The reception Wednesday night was a very enjoyable affair. Mrs. P. E. West, the president, and other ladies of the United Daughters of the Confederacy, were assiduous in their attentions to the old veterans, who were present. Many citizens attended to show them every honor and courtesy.

Delicious ice cream and angel's food cake were served.

COMPLICATIONS
CAUSE DEATH

Mrs. M. J. McCord Passes Away After An Illness of Many Months.

Mrs. M. J. McCord died Wednesday morning at her home on the Buttermilk road, about five miles north of the city, after a lingering illness of a complication of diseases. She was 54 years old and a member of the Methodist church. Ten children, five sons and five daughters, survive. Her funeral services were held at the residence Thursday afternoon by Rev. Lamden and the interment took place in the Boyd burying ground.

CAPT. CHAPMAN'S MOTHER.

Mrs. L. K. Chapman mother of Capt. A. G. Chapman, of Louisville, formerly of this city, died Thursday night at the home of her son, aged 75 years. The burial will take place in Owensboro this morning.

FULL FLEDGED AMERICAN CITIZEN.

Nick Doumas has been granted his final certificate as a naturalized American citizen and will cast his first ballot in the special primary election on Oct. 21. Mr. Doumas is a native of Greece, but has been living in Hopkinsville for about eight years. He came to America from Greece about twelve years ago.

RAIN CAUSED POSTPONEMENT.

On account of rain the Draper Bros. sale, which was advertised for Thursday, was postponed until next Tuesday.

BEARD CASE
IS TRIED

Went to the Jury Yesterday After Two Days Hearing.

VERDICT OF NOT GUILTY

The Indictment Against Ernest Wilson, Col., For Murder, Is Dismissed.

The case against Geo. S. Beard, charged with obtaining money under false pretenses from Miss Mabel Maddux and others in a contest conducted for the Hopkinsville Kentuckian in August, 1914, was begun Wednesday and the following jury from the regular panel accepted by both sides without challenges:

Jno. T. East, Lewis Hamby, Leonard Fuller, G. H. Major, B. F. McKinney, H. M. Cornelius, J. M. Dollins, F. M. Dulin, Gus K. Stephens, John Murphy, Ira Harris and W. P. Ward.

The trial was entered into Thursday morning and argument was begun by the attorneys at 11 o'clock yesterday.

The Commonwealth introduced Mrs. C. F. Shelton, to whom the first prize in the contest, an automobile valued at \$523, was awarded by Beard, the contest manager, following a count of the votes. She elected to take \$500 in cash in lieu of the car and was paid that amount. She did not remember how much money she paid in.

Chas. M. Meacham, proprietor of the Kentuckian, stated that he employed Beard to conduct the contest on a commission and that after awarding the car to Mrs. Shelton, Beard failed to account for \$300 the voting slip turned in showed he had paid to him. He took Beard's receipt for the amount due him also the shortage and attempted later to adjust it with him in a final settlement, but never did. Beard never accounted to him for any part of the \$300 and when Miss Maddux complained to him, he set aside the award to Mrs. Shelton, although \$500 had been paid to her, and gave Miss Maddux the automobile. He also returned several hundred dollars to other contestants and satisfied all complaints. Mrs. Mable Boyd Anderson, T. L. Morrow, E. G. Shelton and L. J. Maddux were other Commonwealth witnesses. The defendant entered a general denial of fraud and claimed that he turned over all money collected.

The court instructed the jury to consider the question as to whether Beard had obtained money under false pretenses, regardless of any subsequent settlement of Beard with Meacham.

Frank Rives, attorney for the defense, spoke for one hour, taking the ground that the evidence was insufficient to convict and pleading for his acquittal.

Commonwealth's Attorney Smith spoke for the prosecution after the noon vacation and the case went to the jury at the conclusion of his speech and at 4 o'clock a verdict of not guilty was returned.

The following cases have been tried or disposed of this week:

W. H. Jones, fraudulently selling mortgaged property. Dismissed. Creed Minor, c. d. w. Dismissed. Mattie Taylor, maintaining nuisance, fined \$25.

Ernest Wilson, charged with the wilful murder of Jno. M. Renshaw, tried and convicted jointly with Bubber Chafin, who has since been acquitted on a new trial; prosecution dismissed and defendant released from jail.

Christian-Todd Tel. Co., obstructing public highway. Fined \$20.

The case against Joe Marquess and M. D. Grubbs, charged with burning a barn, was dismissed after the commonwealth witnesses had been heard.

E. C. Walton, of Stanford, Ky., has bought the Richmond Register.

The frost damage done to the Wis-
 consin tobacco crop is estimated at
 \$1,000,000, and makes 40 per cent of
 the standing crop a total loss.

Fumigating stations will be estab-
 lished by the federal government at
 El Paso, Texas, and at Eagle Pass,
 Laredo and Brownsville. Every per-
 son entering Texas from Mexico will
 be fumigated as a precaution against
 disease.

National guardsmen from New
 Hampshire, Pennsylvania, New Jer-
 sey, District of Columbia, Virginia,
 New York, Alabama, Georgia, Con-
 necticut, Florida, Michigan, Minne-
 sota, Colorado and California have been
 ordered to the border. On arrival
 General Funston was ordered to se-
 lect ten thousand guardsmen and re-
 turn them to the state mobilization
 camps.

Teachers in Pittsburg public schools
 who wed after they sign yearly con-
 tracts with the Board of Education
 cannot be removed from their posi-
 tions until their contracts expire, ac-
 cording to a ruling of J. Rogers Mc-
 Creery, counsel for the Board of
 Education. Heretofore it has been
 the rule that when a teacher married
 she forfeited her position.

Tobacco valued at \$15,000,000, of
 which \$2,000,000 worth is the prop-
 erty of American companies, is being
 removed to the interior by Bulgarians
 from storage warehouses at Greek
 seaport of Kavala. Garrett Droppers,
 the American Minister to Greece, has
 asked the Bulgarian Government to
 permit the American stocks to be
 taken out of the town and brought
 there.

The discovery by the Conservative
 Commission that the greater part of
 the oysters along the western shore
 of the Chesapeake Bay have been
 killed, has caused a sensation among
 those who are in the oyster business,
 as well as consumers of this greatest
 product of the bay. From conserva-
 tive estimate, based on what the Con-
 servative Commission has found by
 actual examination, it is said that at
 least two-thirds of the catch on the
 western shore is dead.

The Census Bureau has issued a
 preliminary statement on tobacco
 manufacturers. The statement gives
 a comparative summary for 1914 and
 1909. In that five-year period there
 was a decrease in the number of es-
 tablishments manufacturing tobacco
 from 15,622 to 13,951 and a decrease
 in the number of owners from 17,634
 to 15,200. All other items show in-
 creases. The number of persons en-
 gaged in the manufacturing of tobacco
 increased from 197,637 to 210,894.
 The capital invested increased from
 \$245,680,000 to \$303,840,000.

ANNOUNCEMENTS.

**SEVERE LOSS BY LEAF CURL**

Disease is Responsible for Failure of
 Peach Crop in Some Orchards—
 Use Bordeaux.

It has been estimated that leaf curl
 causes an annual loss of two millions
 to three millions of dollars to the
 peach industry of the United States.
 It is largely responsible for the failure
 of the peach crop in some orchards
 and for the short life of the trees.

The most familiar aspect of the dis-
 ease is the swollen, distorted appear-
 ance of the leaves in the early spring.
 When the disease first becomes appar-
 ent, the swollen portions of the leaves
 are usually of a light red or pink color.
 The affected leaves gradually turn yellow,
 finally blacken and fall to the
 ground. In some cases the trees may
 be nearly defoliated, thus making it
 necessary to develop an entire second
 crop of leaves. This is a severe strain
 upon the vigor and reserve energy of
 the tree, and unless it is well culti-
 vated, sprayed and fertilized it may
 be permanently weakened. The curl-
 ing and distortion of peach leaves
 may also be caused by aphid or plant
 lice, but the attack of these insects

Sprayed and Unsprayed Peach Foliage
 —Twig on the Left Unsprayed—
 Twig on the Right Sprayed With
 Lime-Sulphur in Early Spring Before
 Buds Started.

can readily be distinguished from that
 of leaf curl. The leaves affected by
 aphid do not become thickened and
 reddish or yellowish green in color.

The spores of this fungus live under
 the rough bark and in the crevices of
 the twigs during the summer and win-
 ter months, germinating early in the
 spring and attacking the young leaves
 as soon as the leaf buds begin to ex-
 pand. Cold, wet weather during the
 months of April and May favors the
 development of the fungus and largely
 determines the amount of injury.
 Warm, dry weather tends to check the
 growth of the fungus and under such
 conditions the injury is slight.

The disease can readily be con-
 trolled by a thorough application of
 concentrated lime-sulphur before the
 buds open in the spring. Bordeaux
 mixture, applied early in the spring
 before the buds start, also will control
 leaf curl, but the lime-and-sulphur
 mixture is advisable because it will
 control San Jose scale as well.

RICH SOIL FOR RASPBERRIES

Northern Slope is Generally Better
 Than Southerly One—Keep Land
 Well Cultivated.

Raspberries do well on any rich
 soil, but the suckering classes, which
 include chiefly the red varieties, pro-
 duce rather better in less heavy loam,
 while the black-cap varieties do best
 in a sandy loam. A northern slope is
 generally better than a southerly one,
 as it is less liable to injury from
 drought.

All varieties need high cultivation.
 Have the land well manured and thor-
 oughly plowed and brought into the
 best condition possible. The best fer-
 tilizer is well-rotted manure. Set in
 rows seven feet apart and at three-
 foot intervals in the rows. Put two
 plants at a place. The distance be-
 tween the rows may be lessened to
 four feet if more space is not avail-
 able. Set in the ground about the
 depth in the soil as the plants natu-
 rally grow. Firm the soil well around
 the roots.

Not more than two shoots should be
 allowed to grow from large root
 each year, and these should be pruned
 off when 18 inches high to encour-
 age the growth of lateral branches,
 because the raspberries fruit more
 heavily on the laterals than on the
 main cane. Keep the soil well culti-
 vated.

RED AND BLACK RASPBERRIES

Plants Should Have Shallow Culture.
 as Roots Are Near Surface—Crop
 Is Profitable.

Red and black raspberries should be
 set six by six, which will require 1,210
 plants per acre. These plants must
 have shallow culture, as their roots
 are all near the surface. Many fine
 plantations are almost ruined by deep
 culture. The crop is profitable when
 picked on time, and neatly marketed.
 A grower can pay for his land in a
 single season with a good crop of ber-
 ries.

Nearly Smothered.

Chandler, N. C.—Mrs. Augusta
 Lomax, of this place, writes: "I had
 smothering spells every day, so bad I
 expected death at any time. I could
 not sit up in bed. I suffered from
 womanly troubles. My nerves were
 unstrung. I had almost given up
 all hope of ever being better. I
 tried Cardui and it did me more
 good than anything I had ever tak-
 en. I am better now than I ever ex-
 pected to be." Thousands of ladies
 have written similar letters, telling
 of the merits of Cardui. It relieved
 their headache, backache and misery,
 just as it will relieve yours. Try
 it. Try Cardui.—Advertisement.

FOR BETTER ROADS

RUTTY SPOTS IN A ROADBED

Uncontrolled Water Is Cause of Many Bad Roads—Drainage Is Recommended as Remedy.

We have been quite interested lately in traveling over roads in central Iowa at a time when we did not expect them to be at all good, to find that where they were dragged the going was quite good; and where not dragged, quite rough. But even where good, there were spots in the roadbed that were rutty. Now, what is the cause of these ruts every mile or two of good, fairly well dragged roads? Nothing but water uncontrolled. These are seepy places. Filling up the ruts by dragging does not prevent the trouble. The drag does not reach the root

Good Road in Colorado.

of the matter. The fact is that just above these seepy places where the ruts are, there is a vein of hard clay coming out, which the water cannot readily penetrate. Hence it comes out under the roadbed, just as a slough comes out on the side of a hill.

The remedy for this is tile drainage, and the drain should not be located in the seepy place, but above it, so as to intercept the water that makes the seep. Just on the same principle that in draining a slough with many branches and prongs, the work is done best by tilling around the prongs and into the slough below at the lowest of them, instead of in the middle of it. For whenever water gets into a slough, the damage is done. The point is to keep it from getting in.

A little attention to this, together with dragging the road after every rain, will give us fairly good roads—dirt roads without any hard surfacing—for nine or ten months in the year. Of course, when these seepy places are drained, they must have a ditch into which the water can run.

Permit us to repeat once more a statement we have been making ever since we made our first address on good roads, 30 years ago: that water uncontrolled is the cause of bad roads; that there are two kinds of water, so to speak; the under water and the upper water. The under water is that which comes in under the roadbed; and the upper-water what comes on it from above or flows in from the sides. The way to get rid of the first is through drainage; particularly in these seepy places. The way to control the second is by grading and then dragging, to put an enamel on the surface of the road.—Wallace's Farmer.

CAPPER DISCOVERS MUD TAX

Farmer Loses on Wheat Crop Because Roads Are Soft and He Cannot Get to Market.

While taxation problems are so generally in the air comes Governor Capper of Kansas and deposes that he has discovered a new tax, "mud tax." "There is an average mud tax of six cents on every bushel of wheat grown in Kansas," says the governor, "and the farmer has to stand that loss. It costs him about \$900 a year because the roads are soft and because he cannot get to market when the price is highest." Motorists will be among those who indorse the governor's words.

Network of Good Roads.

This whole country will some of these days be a network of good roads, which will have a place on the maps along with the railroads. The Lincoln highway linking the East and the West, the Jefferson highway, connecting the lakes and the gulf, and the Dixie overland highway, are a beginning.

Three-Inch Tired Wagon Best.

Buy the wagon with the three-inch tire, is the advice that the highway commissioners at Ames give the farmers. This width tire is not only the least wearing on the road of any width, but, according to test, it requires less draft to pull it. The narrow-tired wagon cuts the road too much, while the wider tire requires too much of a draft to pull.

Clean Brooder Lamps Daily. Brooder lamps should be cleaned

THAT SPECIAL MENU

PREPARATIONS FOR THE UNEXPECTED GUESTS.

Always an Easy Matter for the Competent Housewife to Set a Satisfactory Meal Before Her Casual Visitors.

Now, regarding unexpected guests. Could you not plan to have sufficient food so that your guests could have the same as the family if any dropped in at mealtime? Then it would not make so much extra work. I imagine it is because you are a good cook that people drop in, but if they really come to see you, they will not want you to make any extra trouble for them, and if they come just for the good food you serve I should not encourage the habit. I have very few unexpected guests, but when they come they must take "pot luck." It is well to have canned goods in the house for such emergencies, such as salmon, shrimp, tuna fish, fish flakes, meats, chicken, vegetables and relishes and preserves. Cake or cookies and canned peaches or pears are an easy dessert, and if you have sponge or any light cake, lay the peaches on a slice in the serving dishes and cover all with whipped cream. Salmon in butter gravy, canned peas, hashed potato with red pepper and apple pie pudding is an easy dinner, or creamed fish flakes, mashed potato, canned beets, steamed cup cakes with hot lemon or brandy sauce.

Another is delicate ham, canned string beans, baked potato, German tapioca pudding, or ham and eggs, mashed potato, canned corn, hot chocolate, cornstarch pudding with cream. As you live in the country, perhaps it is not always convenient to have fresh meat on hand, but you could buy half a ham and hang it in a cool place, and slice as needed, then boil the piece left when the best is sliced off. For suppers, have escalloped tuna fish, shrimp wiggle, creamed chipped beef or cheese cream on toast, egg cream toast, goldenrod toast, cheese and potato puff. Any of these with bread or hot biscuit, canned sauce, cake, cookies and tea would be good suppers. Bake your one-egg cake in cupcake tins, one tablespoonful to a tin, and keep on hand for desserts. Place them in covered tin in the oven, just long enough to warm through, and serve with egg or liquid sauce.

About breakfasts I do not think I have any new ideas, as I am obliged to have breakfast early every day, Sunday included, so get something easy. I always have cereal, usually rolled oats, then eggs, boiled, scrambled, fried with bacon, poached, scrambled with chopped ham, minced beef or lamb on toast, hash, fish, warmed-over soup, and with dry toast or warmed-over muffins or brown bread and doughnuts or cookies or drop-cakes and coffee, we are satisfied. Once a week I have griddle cakes with sirup, but it takes longer to cook them than anything else I serve.—Boston Globe.

To Wash Willow Furniture.

To clean willow furniture, provide yourself with a coarse brush dipped in strong salt and water, scrub each piece well, then dry with a soft brush. Salt cleans willow and also keeps it from turning yellow. If it is desired to keep the natural light color of the willow, apply a coat of linseed oil.

By this treatment the willow strands of which the piece is woven will lose their dry brittleness and become softer and more pliable, bending under a blow instead of breaking. This treatment has another good effect besides making the chair last longer—it makes it less noisy. A coat of oil allows the strands to slip more smoothly and easily, and therefore more quietly upon each other.

Brawn.

Do you ever make "brawn?" I buy a meaty shank, four or five pounds, boil until quite well done, remove from liquid, put lean meat through meat chopper, add salt, pepper and sage to taste, moisten with beef liquor. Press down hard in dish. Have dish small enough so it will be filled about full. Place a plate over it, weighed down with an iron. Let it stand overnight in a cool place. Slice when cold. Very nice and economical. This with a nice vegetable or tomato soup made of remainder of liquor makes a nice dinner.—Boston Globe.

Savory Bread.

Slightly moisten some neatly trimmed slices of stale bread with herb flavored and well seasoned milk enriched if desired with a beaten egg. Fry either as they are or else dipped in batter, or, again, brushed over with white of egg and rolled in flour, to a bright golden brown in hot dripping or bacon fat, and serve in a pyramid, bordered with fried onions, or an enclosure round a central mound of green or other vegetables.

Cheese Omelet.

Dessertspoonful grated cheese, one egg, little pepper and salt, one-quarter ounce butter; put butter in frying pan, beat the egg, add pepper, salt and cheese. Put in the pan and stir round. Cook to a light brown, not solid through, and you have a fine cheese omelet.

Bismarck Oysters.

A layer of hot sauerkraut on a hot plate, several fried oysters next and on top three slices of crisply fried ba-

FARM STOCK

START BABY BEEF ON GRAIN

Provide Creep in Pasture So That Young Animals Will Not Be Disturbed by the Cows.

A creep should be provided in the pasture so that calves may have access to grain without being disturbed by cows, as it is very important to start beef calves on grain before they are weaned. They may be kept in a separate lot into which the cows are turned twice a day, if this method is preferred. In this case there will, of course, be no need for creeps or anything else to keep cows from the

Excellent Beef Specimen.

grain which may be fed at such times that the cows will not disturb the calves.

The calves may be started on a mixture of two parts of shelled corn to one part of oats by weight. The oats may be gradually reduced until none is being fed at the end of eight weeks, but while this is being done a little old process linseed oil meal or cotton seed meal should be added and the quantity gradually increased until it makes up about a seventh of the weight of the ration. On full feed calves should eat about two pounds of grain for every hundred pounds of live weight in addition to good roughage. Well-bred calves handled in this way should be in prime condition at the end of about 10 or 12 months.

DIPPING TO ERADICATE TICK

Parasite Probably Does Less Damage Than Either Mite or Louse—Tobacco Dips Are Favored.

Of the commoner external parasites attacking sheep, the tick probably does less real harm than either the mite or the louse. The illustration shows a greatly enlarged figure of the sheep tick. This pest is not easily killed by

Adult Sheep Tick.

the lime and sulphur dips frequently used, but is killed very readily by any of the standard strength tobacco dips, extracts or solutions. The tobacco dips are in general use, as they will kill all the commoner types of external parasites without injury to the animal or the wool.

CHEAPEST GAINS ON PASTURE

Result of Trials Conducted at North Dakota Station—Animals Need Some Grain.

Pigs make the cheapest gains on pasture. Trials at the North Dakota experiment station indicate that brood sows running on good pasture and nursing litters will do as well when receiving one to 1½ pounds of grain per each 100 pounds live weight of sow, as sows in dry lot receiving 2½ pounds grain per day per each 100 pounds live weight. The pasture just about cut the feed cost in two. The pasture alone does not furnish enough feed for either the brood sow with litter or for the weaned pigs. They should be fed some grain, so as to make a rapid growth. In this way the spring pig can be ready for market before real cold weather sets in.

Alfalfa, clover, bromus and winter rye make the earliest pastures. When these have not been provided early spring seeding of such grains as oats and barley or rape are the next best

WAR! What Is It All About?

HAS the whole world gone stark mad over a very foolish and trivial question? Are swords rattling, cannon rumbling, mailed armor glistering just because Russia wanted to show her love for the little brother—Serbia? Tear aside the curtain of Europe's politics and see the grim and sinister game of chess that is being played. See upon what a slim, yet desperate, excuse the sacred lives of millions are being sacrificed. Read the history of the past one hundred years, as written by some of the greatest authorities the world has ever known, and learn the naked, shameful truth. Just to get you started as a Review of Reviews subscriber, we make you this extraordinary offer. We will give to you

FREE—"Europe at War"

A big book and over 300 pages, size 10 x 7 inches, handsomely and durably bound in cloth, containing the dramatic history of the great events leading up to the present time; over 50 important and timely special articles by experts on the different phases of the conflict; hundreds of graphic pictures, portraits, photographs, diagrams, specially drawn war maps, illuminating statistical records, copies of official documents and diplomatic messages exchanged between the powers—a clear, vivid, accurate, permanent, interesting and valuable record—a record which once seen you will not willingly be without. Europe's past and present are here dramatically pictured and presented. Hundreds of illustrations graphically tell their own stories. More fascinating than any romance, here is a history so vivid, so dramatic, so stirring, so fascinating, so realistic that it leaves an ineffable impression.

It is not enough to read the daily news reports. Your ability to comprehend conditions and to discuss them rationally depends on a true interpretation of the meaning and the "reason why" of events. In your mind you must bring order out of chaos and the "Review of Reviews" will do it for you.

Your War News Clarified

Get the Review of Reviews for a Year

Send the Coupon only. It brings the big, handsome book, charges prepaid, absolutely free. All we ask is that—after you get the book and like it—you send 25 cents for shipping and \$1.00 a month for three months to pay for the "Review of Reviews" for one full year.

If the book isn't worth more than you pay for book and magazine together, send it back at our expense. But be prompt! The world-wide fame of this compendium will make these few volumes disappear from our stock room at once. Send your Coupon today—and be in time.

STANDARD BASKET LAW

Fixes Standards for Containers for Fruits, Berries and Vegetables.

Standards for Climax baskets for grapes, other fruits, and vegetables, and other types of baskets and containers used for small fruits, berries, and vegetables in interstate commerce, are fixed by an act approved by the President August 31, 1916. The law will become effective November 1, 1917.

The effect of the act will be to require the use of the standards in manufacturing, sale, or shipment of all interstate commerce, whether the containers are filled or unfilled.

A Funny Addition Sum.

How many apples did Adam and Eve eat?

Some say Eve 8 and Adam 2—a total of 10 only.

Now we figure the thing out far differently: Eve 8 and Adam 8 also—total 16.

We think the above figures are entirely wrong.

If Eve 8 and Adam 82, certainly the total will be 90.

Scientific men, however, on the strength of the theory that the antediluvians were a race of giants, reason something like this: Eve 81 and Adam 82—total 163.

Wrong again. What could be clearer than if Eve 81 and Adam 812 the total was 893?

I believe the following to be the true solution: Eve 814 and Adam 8124 Eve—8938.

Still another calculation is as follows: If 814, Adam, Adam 81242 oblige Eve total 82,056.

MATRIMONIAL MATTERS

One Couple Married Here While Seated in an Automobile.

Walter J. Scates, Jr., formerly of the Crofton neighborhood, but now of New Castle, Ind., and Miss Ida F. Fuller, daughter of Esq. B. F. Fuller, of Crofton, were united in marriage here Thursday by Judge Knight. The ceremony was performed while the young people were sitting in an automobile near the courthouse.

Carroll-Eley.

A license was issued Thursday to Ernest Carroll and Miss Hallie Eley, daughter of R. L. Eley. The wedding is scheduled for Sunday.

Anderson-Dickerson.

License has been issued for the marriage of D. J. Anderson, aged 73 and Mrs. Amanda Dickerson, aged 53.

HIGH SCHOOL NEWS.

The High School football team played Peoples-Tucker School of Springfield, Tennessee yesterday afternoon at the ball park. It was previously announced that a game would be played with Adams on this date, but Adams was unable to play and a game was secured with Peoples-Tucker. This school had never played Hopkinsville before.

The final score was 14 to 6, in favor of Peoples-Tucker School.

High School's team is in excellent condition and there are no weak spots in the line-up. The line-up for High School was selected from the following men:

L. E.—Thompson, Lebkuecher or Anderson.
L. T.—Jackson.
L. G.—Lacy, Woodard, Ashby or Cantrill.
C.—Torian, captain.
R. G.—Garrott, Garnett or Woodard.

R. T.—Hisgen.
R. E.—Anderson or Lebkuecher.
Q. B.—Brown or Harton.
L. H.—Hanberry or Anderson.
F. B.—Moss or Hanberry.
R. H.—Lebkuecher.

The schedule for the season has not been entirely arranged, but most of the big games have been scheduled. It stands as follows:

SCHOOL	DATE	PLAYED
Bethel College	Oct. 7,	at Hopkinsville.
Madisonville	Oct. 14,	at Madisonville.
Owensboro	Oct. 21,	at Hopkinsville.
Paducah	Oct. 28,	at Hopkinsville.
Henderson	Nov. 4,	at Hopkinsville.
Open date	Nov. 11,	
Clarksville	Nov. 18,	at Clarksville.
Open date	Nov. 25,	
Open date	Thanksgiving,	

Wisdom.
Wisdom is not an intellectual excellence only, it is a moral excellence as well.—MacLaren.

NOVEL SOUNDING BOX

Human Skull May Be Made to Do Service.

Most Interesting Experiment, Which May Easily Be Tried by Anyone—Of Considerable Value to the Deaf.

An interesting experiment that proves what a good sounding box the human skull is can be performed by anyone who has a disk phonograph. It is described by H. Gernsback in the Electrical Experimenter as follows: "Stop up both of your ears with cotton as tightly as possible, so that no sound will be heard from the outside. Now place an ordinary darning needle between your teeth by biting on it hard, taking care that the lips or tongue do not touch the needle. The latter is important, because if either lip or tongue touch the needle the sound will be decreased considerably. "For the best results the needle itself should project not more than one or 1½ inches from the mouth. For

Holding a Needle in the Teeth, a Phonograph Record Can Be Heard. N. B.—The Lips and Tongue Must Not Touch the Needle.

that reason the darning needle should be broken off about 1½ inches from its sharp point. It goes without saying that the sharp point should project out of the mouth, while the broken-off end should be inside the mouth.

"Now start an ordinary disk phonograph and carefully press down upon the record with the needle's point held at the same angle as the reproducer's needle is held ordinarily. With a little practice one will become proficient in moving the head at the same ratio of speed as the ordinary reproducer arm is moved from the outside of the record toward the inside. As soon as the needle touches the record with sufficient pressure the inside of the head will be filled immediately with music exceedingly loud and clear.

"A curious result of the experiment is that a person standing near by can hear the music, the head acting as a reproducer in this case."

Mr. Gernsback asks deaf or partially deaf persons to try this and to write to him about the result.

Few States Without Primaries.
All of the states in the Union have some form of primary except Rhode Island, Connecticut, Delaware, New Mexico and Utah. North Carolina has no direct primary, but has a presidential preference primary. In South Carolina, Georgia, Alabama, Arkansas and Texas the Democrats nominate by direct primary, but the statutes make no provision for other parties. A full primary law, passed in Vermont recently, was approved by a majority of 3,700, and will be in effect for the selection of delegates to the national convention. In addition to Vermont and North Carolina, the following states have a presidential preference primary: New Hampshire, Massachusetts, New York, New Jersey, Pennsylvania, Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, Iowa, North Dakota, South Dakota, Nebraska, Maryland, Montana, Oregon and California.

American Dairy Products Active.
Cheese, butter and other butterfats are again becoming important factors in our export trade after a long period of comparative inactivity. England has become our largest foreign market for butter, cheese and condensed milk, having last year taken 3,333,000 pounds of butter, out of total export of 10,000,000 pounds; 18,500,000 pounds of cheese, out of total export of 54,000,000 pounds; and 4,000,000 pounds of condensed milk, out of a total of 37,000,000 pounds. Canada, Cuba, Panama, Australia and Venezuela also take considerable quantities of American butter; Panama and the West Indies are important markets for our cheese; while Cuba, the Netherlands, China, Japan, Hongkong, Cosen, Panama and Brazil take large amounts of American condensed milk.

Whittier's Inspiration Dead.
Miss Priscilla H. Marsh, who as an East Haverhill schoolteacher furnished the inspiration for Whittier's poem, "In School Days," is dead. Miss Marsh was born in Peacham, Vt., seventy-six years ago and started as a schoolteacher in rural schools. It was while she was teaching in East Haverhill that she came to know Whittier intimately, and it was her work among the pupils of that school that led him to write the poem.—Boston Dispatch to New York World.

Antimony Brings High Price.
The prices of antimony in 1915 were probably the highest known since the metal became a regular article of commerce. The high prices were naturally reflected in far the largest production ever made in the United States, according to the United States geological survey's preliminary figures.

HUSBAND OBJECTS TO OPERATION

Wife Cured by Lydia E. Pinkham's Vegetable Compound

Des Moines, Iowa.—"Four years ago I was very sick and my life was nearly spent. The doctors stated that I would never get well without an operation and that without it I would not live one year. My husband objected to any operation and got me some of Lydia E. Pinkham's Vegetable Compound. I took it and commenced

to get better and am now well, am stout and able to do my own housework. I can recommend the Vegetable Compound to any woman who is sick and run down as a wonderful strength and health restorer. My husband says I would have been in my grave ere this if it had not been for your Vegetable Compound."—Mrs. BLANCHE JEFFERSON, 703 Lyon St., Des Moines, Iowa.

Before submitting to a surgical operation it is wise to try to build up the female system and cure its derangements with Lydia E. Pinkham's Vegetable Compound; it has saved many women from surgical operations.

Write to the Lydia E. Pinkham Medicine Co., Lynn, Mass., for advice—it will be confidential.

Official Majority 884.

Burkesville, Ky., Sept. 29.—The official count of the local option election, held in Cumberland county September 23, shows the "dry" majority to be 884. This is the first local option election ever held within the borders of Cumberland county and will result in the closing out of four small distilleries and a half dozen "road houses."

ELEPHANT IS EXECUTED

"Murderous Mary," Beast That Killed Virginia, Is Hanged.

Bristol, Va.—Tenn. Sept. 29.—Condemned as having forfeited her right to live under the laws of Tennessee, "Murderous Mary," a big female circus elephant the other day was put to death at Erwin, Tenn.

Having none of the quick poison at hand the showmen chose to hang the beast. A derrick car of the Carolina, Clinchfield & Ohio Railway was used. Heavy chains were looped about the elephant's neck, and the steam operated crane lifted the massive form into the air. The animal struggled for quite a while before death finally resulted from strangulation.

The showmen are said to have admitted that Mary had slain her eighth man. Her last victim was Walter Eldridge, a Virginian, who was gored to death at Kingsport, Tenn. Showmen valued the animal at \$8,000.

Almost Enough.

The United States is making almost enough dyestuff to supply its own wants now, according to Dr. Thomas H. Norton, Government dye expert.

Japan's Plan.

That Japan will renew the fight for the right to purchase land and emigrate to America after the European war ends, was stated in Washington advices from Tokio.

DR. BEAZLEY

Democratic Campaign

Will Be Opened at The

Court House Hopkinsville, Ky.,

Monday, October 2, 1916

SPEECHES BY

Congressman D. H. Kincheloe

....AND....

Hon. Rainey T. Wells, of Murray

Speaking Will
Begin at - - **1:30 p. m.**

Come Out And Hear The Campaign Issues Aably Discussed.

Profit and Satisfaction

Users of the Empire Cream Separator find that they derive much profit from their milk and that the Empire gives perfect Satisfaction.

The Empire Saves Time, Work and Money.

Time—Waiting for Cream to rise in the old way.

Work—From Washing many different pans and crocks.

Money—Old methods cause a loss of 20 to 50 per cent. of butter fat. With The Empire you stop this loss.

Think about this saving. Let Us put in an Empire Cream Separator for you and get on the money making road.

THE OCT. AMERICAN MAGAZINE.

An article about Charles M. Schwab called "Schwab's Own Story" as told by himself and his associates appears in the October American Magazine. This article describes Schwab and his career with intimate, personal stories connected with his success.

"Between Two Worlds" ends and a new serial by Majorie Benton Cooke, called "Cinderella Jane," begins. There is another dog story by John McIntyre Foote as well as another Bird Man story called "Love's Empire," by Walter Prichard Eaton, Jack Lait's story is "Saturday at Six" and it is fully as funny as his previous tales.

"How I Was Cured of the Bad Habit of Bragging" tells how a salesman who could sell goods always lost his customers by bragging. "Fortunes Made in Popular Song" relates how the composers of the melodies you whistle made their start; and "Three Young Men With Ideas" is the story about three young men who built up the largest country store in America.

Then there is the state article on Nevada; the results of the "Most Wonderful Man I Know" contest; the Interesting People, and the Habit Department which has some unusually good features this month.

FOR SALE

Young Jersey cow, registered. First calf, heifer, subject to register.
W. T. TANDY.

Sudan grass yields from one to eight tons of cured hay an acre.

SUPERANNUATED LIST OF FOUR

Will of Mrs. J. J. Raddell, Providing Sum for Retired Ministers.

Franklin, Ky., Sept. 29.—Four ministers were placed on the superannuated list by the Louisville Conference of the Methodist Episcopal Church, South, at its second session here yesterday. Two hundred and fifty ministers were present when Bishop W. B. Murrah, of Jackson, Miss., called the conference to order. The will of Mrs. J. J. Raddell, of Bowling Green, now in litigation, which left a sum for the aid of superannuated preachers, was discussed. The character and standing of superannuated preachers in the seven districts was taken up.

In response to a motion by Dr. T. L. Hulse, of Hopkinsville, seconded by the Rev. James H. Chandler, of Campbellsville, a collection of \$400 was raised for the aid of superannuated ministers this year. Those placed on the retired list were: The Rev. F. A. Mitchell, of the Eddyville circuit; the Rev. B. F. Orr, of Bardstown; the Rev. J. S. Mitchell, of Eddyville, and the Rev. G. W. Shugart, of Fordsville.

A FINE DAUGHTER.

Mrs. John C. Lawson presented her husband with a fine daughter Wednesday.

WERE MASTERS OF WORLD

Roman Legions Subjugated Before Assimilating the Nations Their Victorious Armies Had Overrun.

The military splendor of Rome has fascinated young and old for centuries. Wherever one touches later ancient civilization there are found the evidences of the presence of the Roman legions. They are in Gaul, in England, in Germany. They are in every country around the Mediterranean basin. They are in the East, in the heart of Asia. The courier system for the dispatch of letters and messages was in their hands. The legions were the vanguard to make the newly acquired territories habitable and productive. Their stationary camps became the trading centers of the communities from which the adventurous merchants pushed onward to spread with their wares Roman thoughts and Roman habits and respect for the Roman way. When the veterans completed their years of service they were colonized and continued in their retirement to carry on the labors which formed the greater portion of their active service.

The Roman army was human. Its soldiers were men, some good, some bad, some humorous, some serious, some lovable, some despicable, but all of them eminently human. The papyrus excavations of the past hundred years have given us a glimpse into the heart and soul of the Roman soldier.—Christian Herald.

SPOUT STEAM, NOT WATER

General Idea Concerning Action of Whales May Easily Be Proved to Be Erroneous.

Since a whale breathes air, when it is below the surface the breath must be held, for if the water should be taken into the lungs the animal would drown. Thus as soon as a cetacean comes to the surface its breath is expelled and a fresh supply inhaled before it again goes down.

The breath which has been held in the lungs for a considerable time under pressure is highly heated, and as it is forcibly expelled into the colder outer air, it condenses, forming a column of steam. A similar effect may be produced by any person if on a frosty morning the breath is suddenly blown from the mouth.

That whales spout out of the blowholes water which has been taken in through the mouth is probably more widely believed than any other popular misconception. As a matter of fact such a performance would be impossible because a whale's nostrils do not open into the back of the mouth, as do those of a man, and the animal is not able to "breathe through its mouth," as can ordinary land mammals.—Roy Chapman Andrews, in New York Independent.

Joy Rider Killed.

John Kilgariff was instantly killed when an automobile in which he was riding hit a tree at the entrance to Jacob Park, Louisville. H. S. Barlow and Lula Coleman, other occupants of the car, escaped injury. They were later arrested.

CARRY N. Y. BY 25,000 VOTES

John Thompson, Metropolitan Editor, Believes President Will Win in East.

Elkton, Ky., Sept. 28.—"There's nothing to it but Wilson," was the statement made here by John Thompson, formerly editor of Pearson's Magazine, of New York, and one of the best known newspaper men of that city, who is here at the bedside of his father, T. E. Thompson, who is quite ill.

Mr. Thompson, himself an independent voter, declared that he believes the Empire State is safe for the Democratic nominee by 25,000 plurality. He enjoys a wide acquaintance with political writers of the metropolis, and says that their investigations so far as he has been able to ascertain, have shown a tendency throughout the nation to stand by the President. He predicts a change in the 2-to-1 Hughes odds in New York before many days, and says the odds as published in no sense reflect the opinion of people capable of sizing up a political situation.

Popular Mechanics Magazine For October.

Brimful of interest is the October Popular Mechanics Magazine. Two hundred and twenty-eight terse articles record the new inventions and recent developments in science and mechanics. This magazine is always noted for its many fine illustrations, and in this respect the October number is better than ever. Among the war pages is a remarkable series of photographs showing the successive steps in the capture and occupation of a German first-line trench. An American aeroplane, of unusual design, in recent tests at Buffalo established a new speed record. A full-page picture of the craft is presented. Other page views show the new bascule bridge over the north branch of the Chicago River; a public-owned power plant proposed for Niagara; our soldiers on duty along the Mexican border; some pieces of furniture which show the trend in designing; several of New Jersey's country clubhouses and golf links; etc.

Ice Is Delivered by Air and Water Route

"Ice is delivered in rather a spectacular way to a householder residing on the bank of Rock River at Cleveland," says the October Popular Mechanics Magazine. "His house is within the shadow of a high bridge and to reach it from the street level one must follow a long round about path on foot. When the ice wagon reaches the bridge its driver announces its arrival by yelling huskily to those in the house below. A man puts out in a boat to deep water, calls the number of pounds he desires, and then gives a signal for its delivery. The ice drops from the bridge to the water, a distance of 128 ft., and is recovered by the boatman."

CAP and BELLS

NOT HARRISON, BUT M'KINLEY

Old Lady, Who Was Always Getting Names Confused, Invited Bill to Come Up by Back Stairs.

His mother lived in an apartment house in the East end. He told her he would send out a man from the shops where he was manager to move her furniture from one room to another, and from another room to one, a little pleasure the old lady allowed herself two or three times a year.

"I'll have him get here about ten o'clock, mother, tomorrow morning. You watch out your window for him, and show him how to get up here—he'll be a little timid about coming into this part of town. You'll know him when you see him—a big, tall, rough-looking fellow. His name is Ben Harrison."

The next morning about ten the old lady looked out her front window, and saw a man standing in the street, gazing up at the apartment house. She threw up the window.

"Are you Ben Harrison?" she called. And the man, who wasn't Ben Harrison, but a slate roofer, and who thought somebody was trying to kid him, replied, "No, ma'am, I'm Bill McKinley."

"Oh dear, yes!" cried the old lady. "I'm always getting names wrong! Just go round the side, Mr. McKinley, and come up the back stairs."—Cleveland Leader.

Same Old World.

"Then you can decipher these cuneiform characters, professor?"

"Oh, yes."

"How interesting. And what do these tablets say?"

"Well, this one speaks of a Chaldean who absconded with 30,000 clam shells. Here's an elopement in Assyrian high life, an account of grafting in office, and a king declares war."

"Um. Reads exactly like a front page of today."

Yea, Verily.

Blinks—What's the matter, old boy? I haven't seen you at the club since your wife got a divorce.

Jinks—Oh, you'll see me there before long. I'm engaged to be married again.

A Vague Theory.

"What is this rice powder doing on your overcoat?"

"Beats me. I've been in a lot of offices today. Must have put that overcoat down on a powder puff some where."

His Misery.

"I don't see why you're so miserable. You've got everything to make you happy."

"Yes, I know I've got everything except the joy of wanting something I can't get."

HIS CHANCE.

Lulu—Why ain't you married, Mr. Phatt?

Mr. Phatt—Nobody wants me, I guess.

Lulu—I guess you never asked my Aunt Priscilla; 'cause I'm sure she'd take anybody.

A Fizzle.

"My speech fell flat."

"You told me you had rehearsed it until you could say it backward or forward."

"I had. But I started it backward and couldn't switch."

Not Greatly Affected.

"The doctor says these clothes will ruin my health."

"What of it, my dear?"

"I didn't suppose the old fogey ever

NO COMPASS NEEDED

Simple Method of Determining Latitude.

Point is to Be Sure of Location of the North Star, Which is Really All the Astronomy Necessary to Know.

There is a very simple way by means of which the novice, untrained in astronomical observation, can determine his latitude, without the aid of complicated and expensive apparatus.

If you were situated on the equator, the North star would be directly north of you. This star must be learned and identified, so that it can be picked out anywhere at a moment's notice. This is all the astronomy you need know—as the location of this star will give the latitude.

When half way to the North pole the North star is midway between the zenith and the northern horizon. At the pole it is directly overhead. In all other places its "angle" varies, being, for example, 30 degrees at New Orleans, 40 degrees at Philadelphia, and so on. The altitude of the North star is the latitude of a place north of the equator. All that is necessary then, to determine the latitude, is to measure the angle of the North star and thus determine the altitude of the celestial pole. This will give the latitude.

Take a pair of ordinary compasses. Open them, and place one point in a level window sill, holding the arm upright. Now point the other arm of the compass at the North Polar star. The angle thus formed by the pair of compasses will be fairly accurate, provided the pointing has been done carefully and the other arm is held at right angles to the sill.

When the compasses have been adjusted, as explained, proceed to measure the angle formed by the arm of the compass. This will indicate your latitude. For every degree of curvature of the earth, the North star rises one degree from the horizon. It is thus an easy matter to see your latitude from the number of degrees made by the angle of your compass.

Another way to discover the latitude of any given place—and a method much more often used—is by means

of the sun. Observations of the sun are depended upon by vessels at sea.

The first thing to do is to ascertain what is known as your true north south line. To do this you must know your longitude and have the correct time. Next, measure the altitude of the sun at apparent noon—that is when its shadow is north. Place a curved piece of cardboard in the window, with the blind drawn down to the wood of the upper window. The angle made by the window will then indicate the altitude of the sun with sufficient accuracy.

Next, consult what is known as the "Analemma" (see diagram). If you live in the northern hemisphere you must subtract from the declination of the sun (which the analemma gives you) the sun's declination. Subtract this result from 90 degrees, and the remainder is your latitude.—Popular Science Monthly.

Blind Eight Years, Sees Now.

Unable to see for eight years, Edward Claycomb, a painter of this city, is recovering his sight by degrees. In 1908 he fell from a house he was painting and in addition to his other injuries he detached the retinas of both eyes. He became blind. Specialists of a dozen cities were consulted, and they all told him his case was hopeless.

For the last several weeks his sight has been returning, and now he can see and read large letters and distinguish between colors. Physicians are puzzled. Claycomb is hopeful that his sight will become normal.—Altoona (Pa.) Dispatch to Philadelphia North American.

Modern Knight of the Road.

It is reported that a "hobo" is traveling along the Northern Electric railway line in northern California, carrying with him a folding frame of iron interlaced with copper, which he connects with the third rail so as to cook his meals by electricity. Furthermore, it is reported that he also carries a long wire which can be hooked over a trolley line to supply current to the same appliance. The story is interesting and humorous; technically, it is somewhat dubious.—Scientific Ameri-

A WAR ON CATERPILLARS.

A war on caterpillars that have been destroying all the foliage of the trees in the woods of Surrey, England, has been declared by flocks of starlings and jackdaws. Battalions of the birds have attacked the mischief makers, and the trees have been black with them, while the noise made by the birds in their search for the caterpillars can be heard for half a mile away. Only those caterpillars which have succeeded in hiding themselves in particularly deep crevices of the trees have escaped the onslaught.

FOUGHT 34 AIR BATTLES

Kiffen Rockwell One of Most Daring in French Service.

Paris, Sept. 29.—The aerial fight in which Sergeant Kiffen Rockwell of Atlanta was mortally wounded by a German airman took place over the Town of Thann. The body of the American aviator fell in reconquered territory in Alsace, near the spot where Rockwell shot down his first adversary five months ago.

Rockwell was serving as a volunteer in the Franco-American flying corps on the Verdun front. A few hours previous to the engagement he had been promoted to the rank of lieutenant, but died without knowing of the new honor. He already had received the military medal for shooting down a German two-seater near Hartmans Wellerkopf in May. He had beaten down another before Verdun and had participated in a thrilling combat in which nearly all the Franco-American flotilla was engaged with a strong German force. He was wounded during that fight by a fragment of shell while engaged alone with three adversaries.

Sergt. Rockwell was one of the first American volunteers to join the foreign legion. He was grievously wounded in a bayonet attack at Arras in May, 1915, before being transferred to the flying corps. He was regarded in French aviation circles as an "ace" a name given to the most skillful and daring pilots. Lieut. William Thaw of Pittsburgh, before he was wounded, and Rockwell made a formidable fighting pair.

They frequently were in the air together and always chasing an adversary.

Rockwell had fought 34 air battles since recovering from his last wound, or an average of more than one a day. When he met his death he was returning from a bombarding expedition in which he flew one of the fighting machines that furnished the escort.

Negro Minister For Wilson.

Paducah, Ky., Sept. 29.—The Rev. R. W. Christian, a well-known negro minister of Louisville, delivered a speech Wednesday night at the County Courthouse in the interest of President Wilson. He was heard by many Democrats, who praised his speech. Christian challenged any negro to debate, but none accepted. He is called the pioneer negro Democrat of Kentucky. For twenty-five years he has been making Democratic speeches. He is an assistant in the Bureau of Census at Washington, D. C. Thursday night he made an address at Hopkinsville.

WANTS TO ORATE.

Hopkinsville, Ky.,
Sept. 27, 1916.

Messrs. Odie Davis, Robert T. Stowe, John Stites and Bob Wooldridge:

In your announcements, and in the by-ways and hedges you have had a great deal to say about why you ought to be Mayor. You boast of what you are, what you have done, and what you propose to do. These things could be said to five thousand people as well as to one individual. I propose that we secure the Tabernacle for Friday night, October 6, 1916, and we will have Mayor Yost, Mayor Dabney and Mayor Meacham for presiding officers. The people shall be the jury. Each candidate can be asked and required to answer any question of a public character or with which the people have a public concern. Some of you claim to be business men, another to have built the Colored School, while all of you have been lifelong members of some political party and devoted to its principles. Some of you say you have been howling successes in public life, Mr. Stowe as County Clerk, Mr. Wooldridge as a Councilman in Hopkinsville, while Mr. Davis zealously guarded the interests of the whole City of White Plains, in Hopkins county, where he made fame and fortune as a Councilman in that city. The people of Hopkinsville want to know who you are, for what purpose you are running, who got you to run, and what you propose to do for them. You can, as you are doing, take a fellow around behind the house and tell him any thing, but that's not fair to the public or to other candidates, and speaking for the people I insist that you come out under the glare of the electric lights and tell 'em all these things you say you have done and can do for the City of Hopkinsville. Now I want to be fair and if you think that by reason of experience I would have an undue advantage of the rest of you, I am willing to act as Umpire and see that every one of you get a square deal in presenting your qualifications and what you propose to do. Answer at once.

Yours very truly,
JOHN FELAND.

Universalist Church.

Rev. Thomas Chapman, Pastor.

Services will be held Sunday forenoon at 11 a. m., and in the evening at 7:30.

At the forenoon service Mr. Chapman will speak on the Parable of the Rich Man and Lazarus. In the evening his theme will be, "Doing as well as Hearing."

Sunday School meets every Sunday at 9:45 a. m.

W. M. S. Meets Monday.

The Woman's Missionary Society of the Methodist church will meet Monday, Oct. 2nd, at 2:30 p. m. All women of the church cordially invited to attend.

MAY CRUSH PUBLICATIONS

Situation Discussed in Address Before Southern California Editors.

Los Angeles, Cal., Sept. 29.—Unless the print paper situation is relieved before long half the country papers in the United States will have to suspend publication, temporarily at least, Bruce Bliven, professor of journalism at the University of Southern California, told members of the Southern California Editorial Association in convention.

He proposed co-operative action to correct the evils responsible for this condition.

"There is no good reason," he said "why newspaper publishers should not have co-operative buying organizations, purchase in big quantities and distribute to their members as the paper is needed. For that matter, there is no good reason why they should not get together and build their own mills, buy their own timber and make their own paper. And certainly they ought to be able to make a stronger concerted protest to congress than they have done against the imposition of the present situation and secure more effective action than now seems likely."

EXCERPTS OF WILSON'S SHADOW LAWN ADDRESS

Time out of number America has devoted itself to peaceful pursuits, and business is the expression.

There never was a time when the pulse of energy and success beat so high in the blood of America.

It would be intolerable for the commerce of the country to be held up.

I do not regard the principle of the eight-hour day as arbitrable.

Labor is not a commodity, but a co-operation.

The chief cloud on the American horizon is the relation between capital and labor. So long as these are antagonistic there will be danger.

Court decisions show that an investigation is the only way to decide whether the railroads can afford an eight-hour day. I believe in the eight-hour day, because under it the men can do better work.

A way must be found for preventing a repetition of a situation like the threatened railroad strike.

America is never going to say to individuals "you must work," but it is going to tell organizations of men that they shall not interrupt the life of the nation.

Guinea pigs do not come from Guinea, nor are they pigs.

JOKE ON FENTON

Trigg County Soldier Boy Writes From Mexican Border.

El Paso, Texas, Sept. 16, 1916.—For the benefit of those who would like to know where our soldiers are and what they are doing, I will write a few lines to your paper.

As you already know, we left Ft. Thomas on the 29th of August for El Paso, arriving here on the 4th of September. We are now in camp about ten miles north-east of El Paso; a great country around here, too. There are lots of things to amuse us—such as the Texas bull snake, horned toads, tarantulas, centipedes and a lot of other disagreeable insects. I think the most amusing thing that has happened, took place the first night we were out here, when Fenton Cunningham, one of our Trigg county boys, came running into camp all out of wind, and when asked the cause of his excitement, he said he had been run in by something, he couldn't tell what. So a bunch of the boys followed him back to where he saw the thing, and found he had only met a large horned toad. We all laughed at him of course, but it was only what any one of us would have done had we been in Fenton's place.

While there a few of the boys who are very home-sick and don't care for everybody knowing it, still the most of them seemed contented. It's very amusing to sit and listen to them talk of that little blue-eyed girl back at home, or hear some big husky youth make such remarks as, "I ought to have had a letter from home today," or "I wish I could hear from mother." It almost touches a tender spot in one who has grown hard by such a life as a soldier must live. But here is hoping that all of our boys will be sent home before they reach that point where the better things in life no longer interest them. And I think they will be. I am sure we will never be sent into Mexico, while that is the very thing the most of us came down here to do, and there will be some of us disappointed if we are sent home without seeing some real service in Mexico. Still I suppose it is best.

The boys are becoming adapted to soldier life very fast. They are no longer the raw militiamen, but are real soldiers—soldiers our state ought to be proud of. I am sure if it ever becomes necessary they will still uphold the name of the Kentucky soldier. With regards to all, I remain,

Sincerely,
MARVIN WYATT,
Co. D, 2nd Ky. Inf't.

—In Cadiz Record.

Mrs. R. B. Rawlins, who spent a week with her sister, Mrs. Albert Lindsay, and other relatives, returned to her home near Paducah, yesterday.

MUCH DAMAGE NEAR TRENTON

Caused by Storm Which Visited That Section Thursday Morning.

Editor Kentuckian:—Trenton and vicinity was visited by an electrical storm and heavy rain Thursday morning and considerable damage was done. Simon Carter, living about a mile and a half south of this place, and a negro hand were in a barn, firing tobacco, when lightning struck the building. Both men were stunned. The barn burned, causing a loss of \$1,000, with no insurance. Dr. Cobb had a mule killed by lightning. Duke Dudley, living near Elkton, lost a stable and all his horses, mules and farm gear. His loss is estimated at from \$1,200 to \$1,800. Great damage was done to crops.

Norton Garth, with his best man—Esq. J. C. Branaugh, left yesterday for Lynchburg, Va., where on Sept. 30 he will be married to Miss Shaner.

LOST DWELLING HOUSE.

Al Gee, col., of Durham, this county, lost his house by fire at an early Thursday morning. The building was struck by lightning. His loss is several hundred dollars. It was not learned whether he had any insurance or not.

When you want fire, tornado, life or bond insurance in the Oldest Strongest Companies see H. D. WALLACE, office up stairs, over Anderson-Fowler Drug Store, Corner Ninth and Main.

To Exterminate Sparrow.

The League of American Sportsmen, whose object is the preservation of birds and wild animals, is preparing to issue a proclamation declaring war on the English sparrow and setting aside a week for waging it, possibly in April or May of next year. The Governors of every state will be asked to aid in the work. Instructions as to the plan of the campaign will be sent to the mayors of all cities, heads of school systems, college presidents, principals of preparatory schools and to heads of the Boy Scouts in each state.

Four principal methods will be recommended: Tearing down the nests, trapping the birds, shooting them under police supervision and under licenses issued by the police authorities, and in cities where water pressure is available turning the hose on the birds at night after they have gone to roost.

Sweden's peat field are estimated to cover nearly 9,900,000 acres.

THE CIRCUS.

"I jes' love th' name o' circus; There's magic in the word, From a boy I've allus loved it And my heart is allus stirred By th' big-top an' menag'rie; By th' gorgeous street parade; By th' razzle-dazzle-dazzle— An' the cool red lemonade.

What's th' use o' me here fibblin', Sayin' that it don't appeal, When th' name o' circus sets me Tinglin' from head to heel? Though I'm borderin' on fifty, An' to work a willin' slave, When th' circus hanker leaves me Then I'll know I'm near th' grave.

Don yer finest bib an' tucker, Get th' kiddies all in line. Whoop! Hooray! Th' band's a-playin'. Gosh, all Spangles! Ain't it fine? Elephants, an' clowns an' horses Ringlin' Day's here. Ain't it joy! Takes me back—back to th' happy Time when I was but a boy."

—Harlan Babcock.

I want 200 country hams.

WALTER KELLY.

Nearing An End.

The Mexican-American Joint Commission expects to conclude its conference not later than October 15. After a short session at New London, Conn., it will adjourn to Atlantic City.
